IF YOU ARE NO LONGER GROWING FLOWERS WILL YOU KINDLY HAND THIS LIST TO A FRIEND WHO  
IS FOND OF FLOWERS. THANK YOU!

This List Cancels All Previous Prices.

## PRICE LIST 1944

# GLADHAVEN GARDENS

George G. Fowler, Prop.

North Main Street

Franklin, N. H.

I wish to extend to you my friends thanks for your patronage in the past and best wishes for your Health, Happiness and Prosperity in the New Year. The outlook is brighter this year than last for the termination of a horrible war. We must continue to buy War Bonds however, and if we have any money left, what is better than to grow a few flowers to brighten our life. I expect many of us will need flowers more than ever this year.

This may be my last price list. Please file this price list away for future use up to February 1st, 1945, as I may not issue a list in 1945. Will accept orders for bulbs on this list while my stock lasts subject to conditions here printed. We had a hard time to grow and harvest our bulbs in 1943 with growing a number of other crops for food.

I find we are not as young as we were when we began growing and selling gladiolus bulbs over 20 years ago. There is a shortage of gladiolus bulbs, many growers have gone out of business, so I would suggest you place your orders early and have them shipped when wanted. If you wait until you are ready to plant I am afraid it will be hard to fill your order. My supply is limited now.

Cordially yours,

GEO. G. FOWLER and MRS. FOWLER.

### CONDITIONS OF SALE

All prices are subject to the following conditions and change without notice.

- (a) Any Federal or State tax that may be imposed on sales. (b) Stock on hand when order is received. (c) No bulbs shipped C. O. D. without a deposit of 25% of the order. (d) No minimum lot split, and no single item less than 10c. (e) Every order for not less than \$1 will be shipped prepaid to any of the 48 states in U. S. On orders less than \$1 add 10c for postage and packing.

### GUARANTEE

I guarantee that the gladiolus bought from me will be true to name and properly cured for planting spring of 1944. Cannot guarantee crop or anything depending on cultivation or weather.

References: Franklin National Bank, Dun & Bradstreet.

### READ CAREFULLY

The first column of figures lists the smallest or minimum lot of a kind put up. The price would be thus for two or more bulbs, 2—10 meaning two bulbs for 10c. No single item for less than 10c. 5 bulbs for half the 10 rate.

### SIZE OF BULBS

Large bulbs are 1¼ inches and over in diameter, medium size are ¾ to 1¼, averaging 1 inch in diameter. Small bulbs are ¼ of an inch and under, most of which will make a small flowering spike and grow a good bulb for the next year. Medium bulbs usually give a very satisfactory spike.

### FULL CULTURAL INSTRUCTIONS WITH EVERY ORDER

ORDER EARLY, use order sheet and state when you will want bulbs. It is safe to ship Express orders at any time. Mail orders are safer shipped after March 1st. A 25% deposit will reserve your order until May 1st. No orders reserved or shipped without a deposit.

Have your name and address on the outside of every letter you write. It may save a lot of bother later. WRITE PLAINLY, and be sure to give your correct address. I am a poor guesser.

I do not substitute one variety for another unless requested. If I am out of the size ordered I fill the order with bulbs of the next nearest size, giving as much or greater value. EARLY ORDER WILL AVOID SUBSTITUTION. YES, I generally give EXTRAS.

Zauberflote, large peach-rose, crimson blotch .....	2—.14.....	.60.....	.90.....	.40.....	.65

### SPECIAL GLADHAVEN ASSORTMENT

For those who do not care about names or who want glads for landscaping or cutting, I highly recommend this beautiful mixture comprising about every known shade in the gladiolus family. Not "loaded" with the old style small primis. All good sorts. For best results plant early in May as some will bloom in 60 days, some 75 days, some 90 days and some late varieties will take 100 days from planting. Figure what is the latest date you can have bloom before frost then go back 100 days and it will give you the latest date you should plant this assortment.

Large Bulbs	40c per doz.	50 for \$1.25	100 for \$2.25
Medium Bulbs	25c per doz.	50 for .75	100 for 1.25
Small Bulbs			100 for .60

Postpaid if order totals \$1

### SURPLUS STOCK AT LESS THAN COST OF PRODUCTION

25 Bulbs of a size and Variety at same rate

NOT PREPAID. No order from following list for less than \$2

	Large Size	Medium Size	Small Size
Bill Sowden .....	.....	\$1.25	.60
Debonair .....	\$2.25	\$1.25	.60
E. I. Farrington .....	\$2.00	\$1.00	.50
Faust .....	.....	\$1.25	.60
Gladhaven Assortment .....	\$1.75	.90	.40
Yellow Wonder .....	\$2.00	\$1.25	...
Yellow Emperor .....	\$2.50	\$1.50	\$1.00

### DAHLIAS

We have a few more of those fancy dahlia roots at \$1.25 a dozen, postpaid. Assorted colors, large flowered mostly. Cannot be shipped until after April 1st.

### IRIS ROOTS

Beautiful hardy iris, no two alike, unlabeled. Grow well in any good garden soil, full sun or partial shade if not too moist. 12 large blooming size plants, \$1 postpaid. Shipped anytime between June 15th and Sept. 1st. June planting best.

### GLADIOLUS BULBLETS

Assorted, comprising most of my best kinds. 300 for 25c

Mailed postpaid with other bulbs. For best results plant last of April or early May. Make blooming size bulbs first year.

### SAF-T STORAGE POWDER FOR GLADIOLUS

My own preparation I have used for many years on my bulbs in storage. About 1 ounce to 100 large bulbs dusted on in storage and left on when planted. Promotes growth of bulb and discourages thrips. Price 25c per 1 pound bag at Garden. Prepaid with bulb orders of \$1 or more, or in lots of 4 pounds.

By reading this list carefully you can save a lot of unnecessary correspondence.

Unpack your bulbs at once when received and store in a cool place until ready to plant. **DO NOT LET YOUR BULBS FREEZE AT ANY TIME.**

If you have THRIPS in your garden or on your bulbs, soaking the bulbs in a solution of corrosive sublimate, 1 ounce to 7 gallons of water over night at planting will help.

When you dig your bulbs in the fall be sure to have them well dried out before placing in winter storage, and don't neglect cleaning off the old bulb and roots on the base of the bulb soon after going into storage. Do not remove the husks before planting time in the spring. After cleaning, storage powder may be scattered over them at the rate of an ounce to 100 large bulbs.

### GLADHAVEN GOLDEN HULL-LESS POP CORN

I am again offering seed of my improved hull-less pop corn. I have been improving this high grade corn by selection and crossing for a number of years until I believe I have the finest quality pop corn grown. A slight cross from golden bantam sweet corn has improved the flavor. This corn is very early for pop corn, 130 days from planting to popping. The seed I sell is from choice selected ears grown in 1943. Those who have been growing tough corn with a field corn flavor and a large number of "old maids" in the bottom of the popper find it hard to believe pop corn can be so sweet and tender. Many people dry out pop corn too much; once properly dried, store in a cool dry closet. Kept in a warm room it will soon refuse to pop. Plant at same time you plant sweet corn in your locality. Hen manure and superphosphate well mixed about a pint to a hill, but away from contact with the seed, is about the best fertilizer for pop corn. **TRY IT.** Don't let over five stalks grow to the hill and have the hills at least 2½ to 3 feet apart. Two ounce package, 18c postpaid.
